_integrators/rational_approximant.cuh

```
graph BT; A["/home/nick/Dropbox  
/accelerInt/exponential  
_integrators/exp4/exp4_init.cu"] --> C["/home/nick/Dropbox  
/accelerInt/exponential  
_integrators/rational_approximant.cuh"]; B["/home/nick/Dropbox  
/accelerInt/exponential  
_integrators/exprb43/exprb43_init.cu"] --> C;
```

The diagram illustrates a dependency structure where two source files, `exp4_init.cu` and `exprb43_init.cu`, both include the header file `rational_approximant.cuh`. The header file is located at the top of the hierarchy, while the source files are at the bottom. Arrows point from each source file to the header file, indicating the inclusion relationship.
